

Nuestro objetivo:

## Tiro al blanco

Escoge un número como tu objetivo, y escríbelo dentro del círculo que tienes arriba. Tira un dado. Escribe el número que sacaste dentro de uno de los círculos al que apuntan las flechas. Luego para hacer diana, escribe en el otro círculo el número que necesitas para lograr tu objetivo.

Lección 14:

Utilizar dibujos matemáticos para representar restas con hasta dos descomposiciones, relacionar los dibujos con el algoritmo y usar la suma para explicar por qué el método de la resta funciona.

**Pingüino africano**

El pingüino africano pone 2 huevos en cada nidada.

**Pez payaso**

El pez payaso tiene escamas, aletas, y branquias.

**Oso polar**

El pelaje denso del oso polar le protege del frío ártico.

**Lechuza**

La lechuza pone generalmente de 4 a 7 huevos en cada nidada.

**Serpientes verdes rugosas**

Las serpientes verdes rugosas ponen de 4 a 12 huevos pegajosos debajo de una piedra plana o tronco.

**Caballito de mar**

Los caballitos de mar machos llevan los huevos en la bolsa incubadora. Ellos nadan con una pequeña aleta en la espalda.

**Zorro ártico**

La hembra de zorro ártico puede dar a luz a una camada de hasta 14 crías.

**Delfín mular**

Los delfines tienen pulmones. Ellos respiran aire a través de un orificio en la parte superior de la cabeza.

**Oso pardo**

Las madres de oso pardo dan a luz a los cachorros durante la hibernación. ¡Ni siquiera se despiertan!

**Conejo**

Las madres de conejo alimentan con leche a sus crías una o dos veces al día.

**Gecko leopardo**

Los geckos leopardo son de sangre fría y absorben la luz del sol para calentarse.

**Iguana verde**

Las iguanas verdes suelen vivir en los árboles, pero bajan a tierra para poner sus huevos.

**Serpiente real de montaña de California**

Esta serpiente es un animal de sangre fría que tiene escamas.

**Tiburón toro**

Las branquias del tiburón toro le permite vivir en las aguas poco profundas y cálidas del océano.

**Ratón de campo**

Las hembras de ratón de campo tienen camadas de 4 a 7 crías.

**Petirrojo**

Las hembras ponen de 4 a 6 huevos moteados azules pálido en la primavera.

**Gallo**

Estas criaturas de sangre caliente son conocidas por cantar al amanecer.

**Orca**

Una orca bebé, o ballenato, nace con la cola primero y puede pesar alrededor de 400 libras.

**Tortugas marinas**

Las hembras ponen los huevos en un agujero de anidación en la arena.

**Cría de foca harpa**

Las madres de foca harpa dan a luz en la primavera y pueden identificar a sus crías por su olor.
