

# Eureka Math Planning and Customization

## Step 1: Discern the Plot - Understand how the topics build from simple to complex

- Review the Table of Contents
- Read the Topic Overviews
- Study the Exit Tickets
- Examine the Assessments

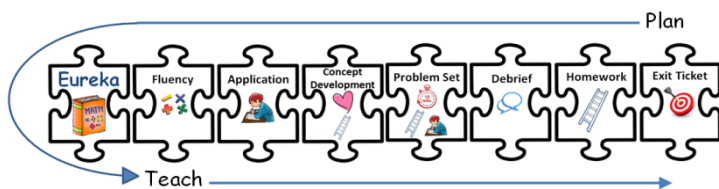

## Step 2: Find the Ladder - Notice how the lesson builds from simple to complex

- Do the Problem Set
- Analyze the complexities, sequences, and progressions across problems
- Anticipate where students may struggle
- Answer the debrief questions

## Step 3: Hone the Lesson - Customize it for 60 minutes and your students' needs

- Select Must Do, Could Do and Extension problems from the Problem Set
- Highlight the Concept Development to include parts for delivery of lesson
  - Materials needed
  - Relationship to the Application Problem
  - Key vocabulary
  - Problems you want to use
- Select debrief questions
- Adjust remaining components
  - Modify Homework to match Must Do
  - Select Fluency
