Independent Auditor's Report

#### **Independent Auditor's Report**

**RSM US LLP** 

To the Board of Education School District U-46 Elgin, Illinois

#### **Report on the Financial Statements**

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of School District U-46, Elgin, Illinois ("District"), as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the District's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the District's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of School District U-46, Elgin, Illinois as of June 30, 2015, and the respective changes in financial position thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

THE POWER OF BEING UNDERSTOOD AUDIT | TAX | CONSULTING

#### **Emphasis of Matter**

As discussed in Note 12 to the financial statements, in the year ended June 30, 2015, the District adopted the reporting and disclosure requirements of Governmental Accounting Standards Board ("GASB") Statement No. 68, Accounting and Financial Reporting for Pensions, an Amendment of GASB Statement No. 27 and GASB Statement No. 71, Pension Transition for Contributions Made Subsequent to Measurement Date – An Amendment of GASB Statement No. 68. The implementation of GASB Statement No.'s 68 and 71 resulted in a restatement of opening July 1, 2014 net position. Our opinion is not modified with respect to this matter.

#### **Other Matters**

#### **Required Supplementary Information**

Accounting principles generally accepted in the United States of America require that the required supplementary information, such as management's discussion and analysis (pages 3 - 12), schedules of net pension liabilities, employer contributions, and schedule of funding progress (pages 55 - 58), and budgetary comparison information (pages 59 – 60) be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the GASB who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

#### Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The accompanying supplementary information, such as the combining and individual fund financial statements, and other schedules as listed in the table of contents as supplementary information and the other information, such as the introductory and statistical sections, are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The supplementary information is the responsibility of management and was derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the supplementary information is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

The other information, including the introductory and statistical sections, has not been subjected to the auditing procedures applied in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on it.

RSM. US LLP

Chicago, Illinois November 12, 2015

### REQUIRED SUPPLEMENTARY INFORMATION – MANAGEMENT'S DISCUSSION AND ANALYSIS

Management's Discussion and Analysis For the Year Ended June 30, 2015

The discussion and analysis of Elgin School District U-46's (the District) financial performance provides an overall review of the District's financial activities for the year ended June 30, 2015. The management of the District encourages readers to consider the information presented herein in conjunction with the basic financial statements to enhance their understanding of the District's financial performance. Certain comparative information between the current year and the prior year is required to be presented in the Management's Discussion and Analysis (the MD&A).

#### **Financial Highlights**

- The assets and deferred outflows of resources of the District exceeded its liabilities and deferred inflows of resources at the close of the fiscal year by \$106,723,207 (net position). Of this amount, a deficit of (\$16,236,147) represents unrestricted net position.
- In total, net position increased by \$10,243,513, which represents a 10.6% overall increase from the prior year. This increase was primarily the result of lower than expected expenses.
- General revenues were \$392,072,466 or 67.8% of all revenues. Program specific revenues, in the form of charges for services and grants, were \$186,195,302 or 32.2% of total revenues of \$578,267,768.
- Overall, the combined revenues of the District's governmental funds were \$4,955,477 more than expenditures. After adding net other financing sources, fund balances increased by \$47,216,856. This operating surplus increased the District's governmental funds' combined fund balance by 26.9% to \$222,458,258 from \$175,241,402 in the prior year.

#### **Overview of the Financial Statements**

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The basic financial statements are comprised of three components:

- Government-wide financial statements,
- Fund financial statements, and
- Notes to the financial statements

This report also contains other supplementary information in addition to the basic financial statements.

#### Management's Discussion and Analysis (Continued) For the Year Ended June 30, 2015

#### Government-wide financial statements

The government-wide financial statements are designed to provide readers with a broad overview of the District's finances, in a manner similar to a private-sector business.

The statement of net position presents information on all of the District's assets, deferred outflows of resources, liabilities, and deferred inflows of resources with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The statement of activities presents information showing how the District's net position changed during the fiscal year being reported. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods.

The government-wide financial statements present the functions of the District that are principally supported by taxes and intergovernmental revenues (governmental activities). The governmental activities of the District include instruction (regular education, special education and other), support services, community services, payments to other governments, on-behalf payments made by the State and interest on debt.

#### Fund financial statements

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The District uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the District can be divided into two categories: governmental funds and fiduciary funds (the District maintains no proprietary funds).

Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a school district's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

#### Management's Discussion and Analysis (Continued) For the Year Ended June 30, 2015

The District maintains six individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures and changes in fund balances for the District's major funds, the General Fund (the General Fund consists of four accounts: Educational Account, Tort Immunity Account, Operations and Maintenance Account and Working Cash Account), Transportation Fund, and the Debt Service Fund. Data from the other three governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these nonmajor governmental funds is provided in the form of combining statements elsewhere in this report.

The District adopts an annual budget for each of the funds listed above. A budgetary comparison statement has been provided for each fund to demonstrate compliance with this budget.

Fiduciary funds are used to account for resources held for the benefit of parties outside the school district. Fiduciary funds are not reflected in the government-wide financial statement because the resources of those funds are not available to support the District's own programs. The accounting used for fiduciary funds is much like that for the government-wide financial statements.

#### Notes to the financial statements

The notes to the financial statements provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

#### Other information

In addition to the basic financial statement and accompanying notes, this report also presents certain required supplementary information concerning the District's progress in funding its obligation to provide pension benefits to its non-certified employees and to provide for the District's retiree's health plan.

#### **District-Wide Financial Analysis**

The District's net position increased by \$10.2 million or 10.6% compared to the prior year. At year-end, total net position was \$106.7 million (see Table 1).

The District's financial position is the product of many factors. However, several events of the last year stand out:

- The District continued to use bond proceeds to construct, improve and expand its facilities, spending \$19,956,480 on capital asset additions.
- The District's expenditures to maintain and operate the facilities within Board policy and guidelines continue to exceed its primary revenues, forcing the District to fund the increase with new debt and available net position. In an effort to continually monitor and contain total operating costs of the District, the District performed efficiency audits that highlighted various areas of cost containment reduction.

Management's Discussion and Analysis (Continued) For the Year Ended June 30, 2015

Increase in net position	\$	10.2	\$ 36.3	(71.9)%_

Management's Discussion and Analysis (Continued) For the Year Ended June 30, 2015

The District's total revenues were \$578.2 million. General revenues, including taxes and general state aid were 67.8% of the total or \$392.0 million. Property taxes (other than for debt service) decreased \$0.4 million over the prior year or (0.1)%. Grants and contributions for specific programs and general state aid brought in \$279.2 million, a 15.6% increase from the prior year. The total cost of all programs and services in 2015 was \$568.0 million. The District's expenses are predominantly related to instruction and support services (caring for and transportation of students, etc.). These expenses accounted for 90.8% of the total (see Table 2.2). The District's other activities were 9.2% of total costs. Total revenues on the statement of activities surpassed expenses, increasing net position by \$10.2 million from the prior year.

Management's Discussion and Analysis (Continued) For the Year Ended June 30, 2015

#### Financial Analysis of the District's Funds

As the District completed the year, its governmental funds reported combined fund balances of \$222,458,258. Revenues for the District's governmental funds were \$579,388,722, while total expenditures were \$574,433,245.

The General Fund experienced a current year operating surplus after net other financing sources of \$41,011,995. This surplus resulted in an increase in the year-end fund balance to \$204,806,889.

The fund balance of the Transportation Fund increased by \$5,006,644 as total revenue was greater than the current year costs for pupil transportation when excluding capital outlay.

The fund balance of the Debt Service Fund decreased by \$214,890.

#### Management's Discussion and Analysis (Continued) For the Year Ended June 30, 2015

#### General Fund Budgetary Highlights

While the District's budget for the General Fund anticipated that expenditures would exceed revenues by \$3,114,274 before other financing sources (uses), the actual result for the year was an excess of revenues over expenditures of \$1,448,022. State sources were under budget by a combined \$2,110,021 as actual grant revenues excluding state on-behalf payments were less than expected. Property taxes were \$6,569,125 less than budget. State on-behalf of payments exceeded budget by \$30,634,999 due to higher on-behalf of contributions made by the State. This resulted in expenditures exceeding budget by \$17,960,216 or 4%. Excluding State on-behalf of payments District expenditures came in under budget by \$12,674,783 or 3%.

#### **Capital Asset and Debt Administration**

#### Capital assets

Table 3 illustrates capital assets, net of depreciation:

#### Table 3 Capital Assets (Net of Depreciation) (in millions)

	201520			2014	Percentage 014 Change		
Land	\$	27.7	\$	27.7	0.0%		
Construction in progress		8.7		2.2	295.5%		
Buildings		334.8		338.0	(0.9)%		
Transportation equipment		4.0		5.5	(27.3)%		
Other equipment		4.2		1.8	133.3%		
Total	\$	379.4	\$	375.2	1.1%		

At June 30, 2015, the District has outstanding commitments relating to construction projects of approximately \$10.6 million.

Additional information about the District's capital assets is included in Note 4 to the basic financial statements.

#### Long-term Obligations

Table 4 on the following page illustrates the District's outstanding long-term obligations. The District issued \$175.9 million in new bond debt in FY 2015, \$40.0 million of which was for working cash purposes, while the balance of \$135.9 restructured the existing bond debt to make the debt service payments level over the next seven years. The District's other long-term obligations decreased by \$21.1 million. Although increases of unamortized bond premium, net pension liability and other postemployment benefits occurred during the year the net decrease was significantly driven by the reduction of accreted interest on capital appreciation bonds, purchase contracts and claims. Additional information is available in Note 5 – Long-Term Obligations.

The District is subject to the Illinois School Code, which limits the amount of bond indebtedness to 13.8% of the most recent available equalized assessed valuation of the District. As of June 30, 2015, the statutory debt limit for the District was \$561,683,025 providing a debt margin of \$257,953,898.

#### Management's Discussion and Analysis (Continued) For the Year Ended June 30, 2015

The ratio of general bonded debt to assessed valuation and the amount of bonded debt per capita are useful indicators of the District's debt position to District management, citizens, and investors. These indicators for the District at the end of fiscal year 2015 were 2.42 percent and \$1,279, respectively. Due to the decline in taxable property value and the issuance of new bonded debt, the general bonded debt to assessed valuation increased compared to fiscal year 2014 in which the ratio was 1.91 percent. The bonded debt per capita increased from fiscal year 2014 when it was \$982.

## Table 4 Outstanding Long-Term Obligations (in millions)

	 2015	A	as Restated 2014	Percentage Change
General obligation bonds/debt certificates Other	\$ 323.0 201.8	\$	263.7 222.9	22.5% (9.5)%
Total	\$ 524.8	\$	486.6	7.9%

#### Factors Impacting the District's Future

At the time these financial statements were prepared and audited, the District was aware of the following existing circumstances that could significantly affect its financial health in the future.

- The Illinois pension reform law (Senate Bill 1) which was to take effect on June 1, 2014 has been found to be unconstitutional. A different pension reform bill could shift additional pension costs to the District.
- Because the State does not provide an ongoing capital improvements budget plan, in the future, the District will be forced to issue additional debt to address the improvements needed for its aging facilities. As can be seen in Table 1, at the end of the current fiscal year, the largest portion of the District's net position reflects its investment in capital assets (e.g., land, buildings, and equipment), less any related debt used to acquire those assets that are still outstanding. The District uses these capital assets to provide services to students; consequently, these assets are not available for future spending. Although the District's investment in its capital assets are reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.
- The current economy in the state continues to affect the District's state funding levels and timing of state receipts. The General State Aid formula was funded at 87.2% in fiscal year 2015. The state is without a long term balanced budget plan which could reduce future District revenues.
- The Illinois General Assembly may consider legislation to freeze property taxes for tax years 2016 and 2017. A tax freeze would reduce District revenue in future years.

Management's Discussion and Analysis (Continued) For the Year Ended June 30, 2015

#### **Requests for Information**

This financial report is designed to provide the District's citizens, taxpayers, and creditors with a general overview of the District's finances and to demonstrate the District's accountability for the money it receives. If you have questions about this report, or need additional financial information, contact the Chief Operations Officer, School District U-46, 355 E. Chicago St., Elgin, IL 60120.

#### Notes to Basic Financial Statements

#### Note 1. Summary of Significant Accounting Policies

School District U-46 operates as a public school system governed by an elected seven-member board of education. The District is organized under the School Code of the State of Illinois, as amended. The District serves the communities of Bartlett, Elgin, Hanover Park, South Elgin, Streamwood, Wayne and portions of Carol Stream, Hoffman Estates, St. Charles, Schaumburg, and West Chicago.

The accounting policies of the District conform to accounting principles generally accepted in the United States of America (GAAP) as applicable to governments. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The following is a summary of the more significant accounting policies:

#### Financial Reporting Entity

As defined by generally accepted accounting principles established by the Governmental Accounting Standards Board (GASB), the financial reporting entity consists of the primary government, as well as component units, which are legally separate organizations for which elected officials of the primary government are financially accountable. Financial accountability is defined as:

- (1) Appointment of a voting majority of the component unit's board, and either a) the ability to impose will by the primary government, or b) the possibility that the component unit will provide a financial benefit to or impose a financial burden on the primary government; or
- (2) Fiscal dependency on the primary government and the possibility that the component unit will provide a financial benefit to or impose a financial burden on the primary government.

Financial benefit or financial burden is created if any one of the following relationships exists:

- (1) The primary government is legally entitled to or has access to the component unit's resources.
- (2) The primary government is legally required or has assumed the obligation to finance the deficits of, provide support to, the component unit.
- (3) The primary government is obligated in some manner for the other component unit's debt.

Based upon the application criteria, no component units have been identified that should be included within the reporting entity.

The District is the administrative agent for the Northern Kane County Regional Career and Technical Education System (the System), a joint governed organization of School District U-46 and other local districts. The System is considered a separate entity for financial reporting purposes and issues its own basic financial statements which are available at 355 E. Chicago St., Elgin, IL 60120.

#### Government-Wide and Fund Financial Statements

#### Government-Wide Financial Statements

The government-wide Statement of Net Position and Statement of Activities report the overall financial activity of the District. Eliminations have been made to minimize the double counting of internal activities of the District. The financial activities of the District consist of governmental activities, which are primarily supported by taxes and intergovernmental revenues.

The Statement of Net Position presents the District's non-fiduciary assets and liabilities with the difference reported as net position.

#### Notes to Basic Financial Statements

#### Note 1. Summary of Significant Accounting Policies (Continued)

#### Government-Wide and Fund Financial Statements (Continued)

#### Government-Wide Financial Statements (Continued)

The Statement of Activities demonstrates the degree to which the direct expenses of a given function (i.e., instruction, support services, etc.) are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function. Program revenues include (a) charges paid by the recipients of goods or services offered by the programs (including fines and fees), and (b) grants and contributions that are restricted to meeting the operational requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

Fiduciary funds are excluded from the government-wide financial statements.

#### Fund Financial Statements

Separate financial statements are provided for governmental funds and fiduciary (agency) funds, even though the latter are excluded from the government-wide financial statements. The fund financial statements provide information about the District's funds. The emphasis of fund financial statements is on major governmental funds, each displayed in a separate column.

The District reports the following major governmental funds:

#### General Fund

The General Fund is the general operating fund of the District. It is used to account for all financial resources except those required to be accounted for in another fund. The District's General Fund consists of four accounts: the Educational Account, which records direct costs of instruction and administration, including the District's food service operations, the Tort Immunity Account, which records the District's risk financing activities, the Operations and Maintenance Account, which reports all costs of maintaining, improving or repairing school building and property and the Working Cash Account, which accounts for financial resources held by the District to be used for temporary interfund loans to other District funds.

#### Transportation Fund

The Transportation Fund, (a special revenue fund) accounts for all revenues and costs relating to the transportation of pupils.

#### Debt Service Fund

The Debt Service Fund, formerly the Bond and Interest Fund, (a debt service fund) accounts for the accumulation of resources for, and the payment of, general long-term debt principal, interest and related costs.

The District also reports the following other fund types/funds, aggregated and reported as nonmajor governmental funds:

#### Special Revenue Funds

The Special Revenue Fund type is used to account for the proceeds of specific revenue sources (other than those accounted for in Debt Service, Capital Projects or Fiduciary Funds) that are legally restricted to expenditures for specified purposes. The District's nonmajor special revenue fund is the Municipal Retirement / Social Security Fund, which accounts for the District's share of retirement benefit and social security costs for employees.

Notes to Basic Financial Statements

### Note 1. Summary of Significant Accounting Policies (Continued)

#### Government-Wide and Fund Financial Statements (Continued)

#### Fund Financial Statements (Continued)

#### Capital Projects Funds

The Capital Projects Funds are used to account for and report financial resources that are to be used for expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets. The District's nonmajor capital projects funds are the Capital Projects Fund, formerly the Site and Construction Fund, which accounts for financial resources to be used for the acquisition, construction or renovation of major capital facilities, and the Fire Prevention and Safety Fund, which is used to account for the altering, reconstructing and repairing of the existing school buildings of the District.

#### Fiduciary Fund

The reporting focuses on assets and liabilities. The District's fiduciary funds are agency funds, the Student Activity Funds. These funds account for assets held by the District as an agent for the students and teachers. The funds are custodial in nature and do not involve the measurement of results of operations. The amounts due to the activity fund organizations are equal to the assets.

#### Measurement Focus and Basis of Accounting and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flow takes place. Nonexchange transactions, in which the District gives (or receives) value without directly receiving (or giving) equal value in exchange, include various taxes, state-shared revenues and various state, federal and local grants. On an accrual basis, revenues from taxes are recognized in the period in which they are intended to finance, when the District has a legal claim to the resources. Grants, entitlements, state-shared revenues and similar items are recognized in the fiscal year in which all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collected within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the District considers revenues to be available if they are collected within sixty (60) days of the end of the current fiscal period. The District uses sixty days in order to capture reimbursement payments released by the State of Illinois during the month of August. The District also considers property taxes to be available if they are collected within sixty (60) days of the end of the current period.

Significant revenue sources which are susceptible to accrual include property taxes, other taxes, grants, and interest. All other revenue sources are considered to be measurable and available only when cash is received.

Expenditures generally are recorded when the liability is incurred, as under accrual accounting. However, debt service expenditures, as well as expenditures related to compensated absences, termination benefits, and claims and judgments, are recorded only when payment is due. General capital asset acquisitions are reported as expenditures in governmental funds.

#### Notes to Basic Financial Statements

#### Note 1. Summary of Significant Accounting Policies (Continued)

#### **Real Estate and Other Taxes**

Property taxes are levied each year on all taxable real property in the District on or before the last Tuesday in December. The 2014 tax levy was passed by the Board of Education on December 15, 2014, and attached as an enforceable lien on the property as of the preceding January 1. The taxes become due and collectible in March and September 2015 in Cook County and in June and September 2015 in DuPage County and Kane County, and are collected by the County Collector, who in turn returns to the District its respective share. The District receives the remittances from the County Treasurer within one month after collection.

The District has recognized as revenue 50% of the 2014 tax extension and 50% of the 2013 tax extension in the current fiscal year based on estimated collections, as this is the period for which the taxes have been levied (intended to finance). Property taxes are recorded net of estimated allowance for uncollectible accounts. The allowance for uncollectible accounts is based on collection history and is estimated at 1.3% of the total levy. As of June 30, 2015 the property tax allowance was as follows:

Fund	Allowance	
General Fund	\$	3,007,075
Debt Service Fund		567,320
Transportation Fund		210,006
Nonmajor Governmental Funds		181,802
	\$	3,966,203

The District has recorded a receivable for the uncollected portion of the 2014 taxes extended. The District has recorded a deferred inflow of resources net of any allowance, which approximates 50% of the 2014 tax extension which will be recognized as revenue in the following fiscal year, the period for which those taxes were levied.

Revenue from replacement taxes is recognized when collected by the state, prior to disbursement to the District.

#### Investments

The investments are stated at fair value, based on quoted market prices.

#### Prepaid Items

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items. The method used to report prepaid items is the purchase method.

#### Inventories

Inventories are valued at cost, which approximates market, using the first-in/first-out (FIFO) method. The cost of governmental fund-type inventories are recorded as expenditures when purchased. Year-end balances are recorded as assets. General Fund inventory consists primarily of school supplies.

#### Capital Assets

Capital assets are recorded at historical cost and depreciated over their estimated useful lives (excluding salvage value). Donated capital assets are recorded at their estimated fair value at the date of donation. Estimated useful life is management's estimate of how long the asset is expected to meet service demands.

#### Notes to Basic Financial Statements

#### Note 1. Summary of Significant Accounting Policies (Continued)

#### Capital Assets (Continued)

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized. The District maintains a capitalization threshold of \$10,000. All reported capital assets except land and construction in progress are depreciated. Improvements are depreciated over the remaining useful lives of the related capital assets. Depreciation for assets of governmental activities is computed using the straight-line method over the following useful lives:

Buildings	40 years
Transportation equipment	5 years
Other equipment	3-10 years

#### Interfund Transactions

The District has the following types of interfund transactions:

Loans – amounts provided with a requirement for repayment. Interfund loans are reported as interfund receivables (due from or advances to other funds) in lender funds and interfund payables (due to or advances from other funds) in borrower funds.

*Transfers* – flows of assets (typically cash) without equivalent flows of assets in return and without a requirement for repayment. In governmental funds, transfers are reported as other financing uses in the funds making transfers and as other financing sources in the funds receiving transfers.

#### **Compensated Absences**

The District records compensated absences for vacation benefits as a liability in the government-wide financial statements as the benefits are earned if the employees' rights to receive compensation are attributable to services already rendered and it is probable that the District will compensate the employees for the benefits through paid time off or some other means.

#### Deferred Inflows of Resources, Deferred Outflows of Resources and Unearned Revenue

The District reports deferred inflows of resources, deferred outflows of resources and unearned revenue on its financial statements.

Deferred inflows of resources are the acquisition of net position or fund balance that is applicable to future reporting periods. Property taxes that are received or recorded as receivables prior to the period the levy is intended to finance are recorded as deferred inflows of resources on both fund financial statements and government-wide financial statements. Potential grant revenue is recorded as deferred inflows of resources on the fund financial statements when it has not yet met both the "measurable" and "available" criteria for recognition in the current period.

Deferred outflows of resources are the consumption of net position that is applicable to future reporting periods. The net difference between projected and actual earnings on pension plan investments and changes in proportion and differences between employer contributions and proportionate share of contributions are reported as deferred outflows or inflows of resources on the government-wide financial statements. The District's pension payments made subsequent to the pension liability measurement date are also considered to be deferred outflows of resources on the government-wide financial statements. See Note 7 for further discussion of the District's deferred outflows and inflows of resources related to pensions.

Unearned revenue arise when resources are received by the District before it has legal claim to them, as when grant monies are received prior to the incurrence of qualifying expenditures. In subsequent periods, when revenue recognition criteria are met or when the District has a legal claim to the resources, the liability for unearned revenues is removed from the financial statements and revenue is recognized.

#### Notes to Basic Financial Statements

#### Note 1. Summary of Significant Accounting Policies (Continued)

#### Long-Term Obligations

Long-term debt is recognized as a liability of a governmental fund when due or when resources have been accumulated in the debt service fund for payment early in the following year. Other obligations (e.g. compensated absences, claims and judgments and postemployment benefits), are reported as fund liabilities when amounts have matured or are due and payable rather than when the liability is expected to be financed from expendable available financial resources. The remaining portions of such obligations have been reported as liabilities in the statement of net position.

The District has issued two types of general obligation bonds, a conventional type for which interest is paid on the bonds semi-annually and a capital appreciation type, for which no interest is paid, but rather the interest "accretes" to long-term interest semi-annually and is finally paid upon maturity of the bonds.

In the government-wide financial statements, long-term debt and other long-term obligations are reported as liabilities in the statement of net position.

#### Debt Premium, Discount and Debt Issuance/Refunding Costs

In the fund financial statements, bond premiums and discounts, as well as issuance costs, are recognized in the period the bonds are issued. Bond, debt certificate, and purchase contract proceeds are reported as "other financing sources" as are applicable premiums or discounts. Issuance costs, even if withheld from the actual net proceeds received, are reported as expenditures.

In the government-wide financial statements, bond premiums and discounts, as well as deferred refunding amounts, are capitalized and amortized over the life of the bonds. Bonds payable are reported net of the applicable bond premium and discount. Deferred refunding amounts are reported as deferred outflows or deferred inflows of resources and amortized over the term of the related debt. All amortization is computed using the straight-line method. Debt issuance costs are expensed when incurred.

#### Fund Balances

Within the governmental fund types, the District's fund balances are reported in one of the following classifications:

**Nonspendable** – includes amounts that cannot be spent because they are either: a) not in spendable form; or b) legally or contractually required to be maintained intact. At June 30, 2015, the District's nonspendable fund balances in the general fund related to inventories for \$78,087, and prepaid expenses of \$778,449.

**Restricted** – includes amounts that are restricted to specific purposes, that is, when constraints placed on the use of resources are either: a) externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments; or b) imposed by law through constitutional provisions or enabling legislation.

**Committed** – includes amounts that can only be used for specific purposes pursuant to constraints imposed by formal action of the District's highest level of decision-making authority. Committed amounts cannot be used for any other purpose unless the District removes or changes the specified highest level of decision-making authority rests with the District's Board of Education. The District passes formal resolutions to commit their fund balances.

#### Notes to Basic Financial Statements

#### Note 1. Summary of Significant Accounting Policies (Continued)

#### Fund Balances (Continued)

**Assigned** – includes amounts that are constrained by the District's *intent* to be used for specific purposes, but that are neither restricted nor committed. Intent is expressed by: a) the District's Board of Education itself; or b) a body or official to which the Board of Education has delegated the authority to assign amounts to be used for specific purposes. The District's Board of Education has not delegated authority to any other body or official to assign amounts for a specific purpose within the General Fund. Within the other governmental fund types (special revenue, debt service, capital projects) resources are assigned in accordance with the established fund purpose and approved budget/appropriation. Residual fund balances in these fund types that are not restricted or committed are reported as assigned.

**Unassigned** – includes the residual fund balances that have not been restricted, committed, or assigned within the General Fund and unassigned deficit fund balances of other governmental funds.

It is the District's policy to consider restricted resources to have been spent first when an expenditure is incurred for which both restricted and unrestricted (i.e. committed, assigned or unassigned fund balances) are available, followed by committed and then assigned fund balances. Unassigned amounts are used only after the other resources have been used.

The General Fund includes the Working Cash stabilization account. Under the State of Illinois School Code (School Code), the District is authorized to incur indebtedness and issue bonds and to levy a tax annually on all taxable property of the District in order to enable the District to have in its treasury at all times sufficient money to meet demands thereon. These working cash funds may be lent to other District governmental funds in need, but may only be expended for other purposes upon the passage of a resolution by the Board of Education to abolish the funds to the educational account, of the General Fund, or abate the fund to any fund of the District most in need. At June 30, 2015, the District had working cash stabilization fund balances of \$124,550,002 that have been classified as unassigned fund balances in the General fund.

Fund	F	und balance	Purpose of restriction
General Fund Debt Service Fund Capital Projects Fund IMRF/Social Security Fund	\$	23,941,233 4,307,591	Operations and maintenance Repayment of principal and interest on long-term debt School construction projects Employee pension
	\$	30.003.564	

At June 30, 2015, the District had the following fund balances restricted for various purposes as follows:

#### Notes to Basic Financial Statements

## Note 1. Summary of Significant Accounting Policies (Continued)

#### Net Position

Net position consists of the following categories:

**Net investment in capital assets** – consists of capital assets, net of accumulated depreciation and reduced by outstanding balances for bonds and other debt that are attributable to the acquisition, construction, or improvement of those assets.

**Restricted net position** – results when constraints placed on net asset use are either externally imposed by creditors, grantors, contributors, and the like, or imposed by law through constitutional provisions or enabling legislation.

**Unrestricted net position** – consists of net position that does not meet the criteria of the two preceding categories.

When both restricted and unrestricted resources are available for use, it is the District's policy to use restricted resources first, then unrestricted resources, as they are needed.

#### Eliminations

Eliminations have been made in the statement of net position to remove the "grossing-up" effect on assets and liabilities within the governmental activities column for amounts reported in the individual funds as interfund receivables and payables. Similarly, transfers between funds have been eliminated in the statement of activities.

#### Use of Estimates

The preparation of financial statements in conformity with the modified accrual basis of accounting requires management to make estimates and assumptions that affect the amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenditures during the period. Actual results may differ from these estimates.

#### Note 2. Budgetary Information

Annual budgets are adopted for all governmental fund types. The annual budgets are adopted on the modified accrual basis of accounting at the fund level. All budgets lapse at fiscal year-end. The District maintains a system to measure the uncommitted budget amount available for expenditures at any time during the year. For budgetary purposes, appropriations lapse at June 30, 2015 and outstanding encumbrances are canceled at that date.

On or before July 1 of each year, the Superintendent is to submit for review by the Board of Education a proposed budget for the school year commencing on that date. After reviewing the proposed budget, the Board of Education holds public hearings and a final budget must be prepared and adopted no later than September 30. The 2014-15 budget was adopted September 29, 2014.

The appropriated budget is prepared by fund and by function. The Board of Education may make transfers between functions within a fund not exceeding in the aggregate 10% of the total of such fund, and may amend the total budget following the same procedures required to adopt the original budget. The legal level of budgetary control is at the fund level.

## **Notes to Basic Financial Statements**

#### Note 3. Deposits and Investments

*Permitted Deposits and Investments* - State statutes and Board policy authorize the District to invest any available funds in: (1) direct obligations of or obligations guaranteed by the United States or its agencies; (2) commercial paper issued by United States corporations rated within the three highest classifications by at least two standard rating services and maturing within 180 days or less; (3) interest bearing savings accounts, certificates of deposit, or other time deposits in federally insured and/or state chartered banks and savings and loans associations; (4) the Illinois School District Liquid Asset Fund Plus (ISDLAF+); (5) the Illinois Funds; (6) money market mutual funds; (7) bankers' acceptances of banks whose senior obligations are rated in the top two rating categories by two national rating agencies and maintain that rating during the term of the investment; (8) repurchase agreements of government securities; (9) and interest bearing bonds of any county, township, city, village incorporated town, municipality, or school district. Shares in the ISDLAF+ and the Illinois Funds represent investments in external investment pools that are regulated by the State of Illinois; the fair value of the position in the pools is the same as the value of the pool shares.

## Deposits

As of June 30, 2015, the District had deposits with federally insured financial institutions of \$263,006,047 with the book balances totaling \$262,622,793. The deposits held in fiduciary funds with federally insured financial institutions were \$3,656,901 with the book balances totaling \$3,414,546.

*Custodial credit risk – deposits.* In the case of deposits, custodial credit risk is the risk that in the event of a bank failure, the District's deposits may not be returned to it. The District's investment policy requires all bank deposits in excess of FDIC insurance limits be secured by collateral. As of June 30, 2015, the District was not exposed to custodial credit risk.

#### Investments

#### Interest Rate Risk

The District's investment policy does not limit its investment portfolio to specific maturities.

#### Credit Risk

The District's general investment policy is to apply the prudent-person rule: Investments are made as a prudent person would be expected to act, with discretion and intelligence, to seek reasonable income, preserve capital, and, in general, avoid speculative investments. Investment choices are not limited beyond the State statutes.

#### Concentration of Credit Risk

The District places no limit on the amount it may invest in any one issuer.

#### **Notes to Basic Financial Statements**

#### Note 3. Deposits and Investments (Continued)

The following schedule reports the fair values and maturities (using the segmented time distribution method) for the District's investments at June 30, 2015. The schedule also includes credit ratings by Standard & Poor's at June 30, 2015:

		Investment Maturities (in Years)				% of Total	Credit
Investment Type	Fair Value		Less than 1		1 - 5	Investments	Ratings
Illinois School District Liquid Asset Fund	\$ 372,949	\$	372,949	\$	-	6.14%	AAAm
Government Money Market Funds	1,294,456		1,294,456		-	21.32%	AAAm
	 1,667,405	\$	1,667,405	\$	-		
Illinois Funds	 4,404,583	_				72.54%	AAAm
	\$ 6,071,988	-			_	100.00%	

The Illinois School District Liquid Asset Fund is shown as maturing in less than one year because the weighted average maturity of the pool is less than one year.

#### Custodial Credit Risk - Investments

For an investment, this is the risk that, in the event of the failure of the counterparty, the District will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The Illinois School District Liquid Asset Fund Plus, Illinois Funds, and the Government Money Market Funds held by the District are not subject to custodial credit risk.

The above deposits and investments (plus \$5,980 held by the District as petty cash) are presented in the basic financial statements as cash and investments as follows:

Cash and investments per statement of net position	\$ 268,700,761
Cash and invetsments per statement of fiduciary assets and liabilities	3,414,546

Total

\$ 272,115,307

# Notes to Basic Financial Statements

## Note 4. Capital Assets

Capital asset balances and activity for the year ended June 30, 2015, are as follows:

			Transfers and Additions			J	Balance June 30, 2015	
Capital Assets, not being depreciated: Land Construction in progress	\$	27,687,264 2,195,121	\$	- 10,056,521	\$	- 3,588,603	\$	27,687,264 8,663,039

#### **Notes to Basic Financial Statements**

## Note 5. Long-Term Obligations (Continued)

At June 30, 2015 general obligation bonds consisted of the following:

## General Obligation Bonds - Payable by the Debt Service Fund \$18,300,000, 1999 School Building Bonds due in installments of \$1,725,000 to \$7,000,000 through 2019 with interest due semiannually at 5.00% to 5.15%. \$ 17,050,000 \$57,999,743, 2001 Capital Appreciation Construction Bonds due in an annual installment of \$10,017,567 in 2016 with interest due semiannually at 5.2%. 10,017,567 \$54,499,619, 2002 Illinois Development Finance Authority Program Capital Appreciation Revenue Bonds due in annual installments of \$373,209 to \$8,644,763 in years 2016 through 2021 with interest due annually in years of maturity at a rate yielding 5.3789%. 30,323,202 \$65,999,779, 2003B Capital Appreciation School Bonds due in annual installments of \$960,659 to \$10,591,479 through 2023 with interest due annually in years of maturity at a rate yielding 5.35%. 35,509,673 \$34,405,000 2009 General Obligation Limited School Bonds due in annual installments of \$1,135,000 to \$2,495,000 through 2023 with interest due semiannually at 3.25% to 5.00%. 11,745,000 \$25,925,000, 2011A Taxable General Obligation Limited School Bonds due in annual installments of \$275,000 to \$3,085,000 through 2022 with interest due semiannually at 1.65% to 6.0%. 15,825,000 \$2,030,000, 2011B Taxable General Obligation Limited School Bonds due in annual installments of \$200,000 to \$230,000 through 2021 with interest due semiannually at 0.65%. 1,230,000 \$415.000, 2012A Taxable General Obligation Limited Refunding School Bonds due in an annual installment of \$10,000 through 2016 with interest due semiannually at 1.85%. 10,000 \$31,045,000, 2012B Taxable General Obligation Limited School Bonds due in annual installments of \$70,000 to \$5,705,000 beginning in fiscal year 2016 through 2026 with interest due semiannually at 3.0% to 4.5%. 22,025,000 \$44,310,000, 2015A General Obligation Limited School Bonds due in annual installments of \$2,955,000 through \$8,205,000 beginning in fiscal year 2028 through 2034 with interest due semiannually at 5.00%. 44,310,000 (continued)

## **Notes to Basic Financial Statements**

## Note 5. Long-Term Obligations (Continued)

## General Obligation Bonds - Payable by the Debt Service Fund (Continued)

\$10,780,000, 2015B Taxable General Obligation Limited Refunding Bonds due in annual installments of \$2,170,000 through \$6,215,000 beginning in fiscal year 2026 through 2028 with interest due semiannually at 3.7% to 3.95%.	10,780,000
\$19,235,000, 2015C General Obligation Refunding School Bonds due in annual installments of \$1,810,000 through \$6,095,000 beginning in fiscal year 2016 through 2020 with interest due semiannually at 2.00% to 5.00%.	19,235,000
\$101,575,000, 2015D General Obligation Refunding School Bonds due in annual installments of \$6,480,000 through \$10,900,000 beginning in fiscal year 2024 through 2035 with interest due semiannually at 5.00%.	101,575,000
Total General Obligation Bonds	\$ 319,635,442

## Debt Service Requirements to Maturity - General Obligation Bonds

Annual debt service requirements to maturity for all bond issues to be paid from property taxes of the Debt Service Fund for each of the next five fiscal years and in five year increments thereafter are as follows:

Due in Fiscal Year	Principal	Interest	[	Total Debt Service
2016	\$ 18,985,897	\$ 23,208,610	\$	42,194,507
2017	19,555,883	22,651,842		42,207,725
2018	20,889,896	21,300,530		42,190,426
2019	22,661,283	19,516,546		42,177,829
2020	19,228,841	22,943,767		42,172,608
2021-2025	71,028,642	96,244,876		167,273,518
2026-2030	71,305,000	29,746,960		101,051,960
2031-2035	75,980,000	10,651,250		86,631,250
	\$ 319,635,442	\$ 246,264,381	\$	565,899,823

Interest maturities include \$74,017,139 of accreted interest on capital appreciation bonds.

## Notes to Basic Financial Statements

## Note 5. Long-Term Obligations (Continued)

#### Accreted Interest on Long-term Debt - Capital Appreciation Bonds

The District has three outstanding capital appreciation bond issues. Interest on the capital appreciation bonds are paid only when principal payments are made, not semi-annually like conventional bond issues. The District records the accretion of interest as long-term debt in the statement of net position as if the interest had been paid semi-annually. Accreted interest on long-term debt was reduced by a net total of \$45,786,737 during the fiscal year ended June 30, 2015. At year end, the total interest accreted on the capital appreciation bonds was \$74,017,139.

#### Debt Certificates

The District has one outstanding debt certificate. Payments are expected to be made from the Debt Service Fund through transfers from the General Fund. Descriptions of the District's debt certificate are as follows:

\$6,200,000, 2007 Debt Certificates (Qualified Zone Academy Bonds) due in annual installments of \$413,189 to \$432,360 through 2023 with interest due annually at 0.65%.

\$ 3,381,622

#### Purchase Contracts

As of June 30, 2015, the District had entered into 3 lease/purchase contracts for copiers, buses, computer equipment, and other equipment. The total cost of the property currently under leases is \$10,226,826. Future minimum payments total \$4,772,103 of which \$118,807 represents interest and \$4,653,296 represents principal. Payments are expected to be made from the Transportation Fund and the Debt Service Fund through transfers from the General Fund. Upon entering a contract, the District records the activity as capital outlay expenditures with an offsetting credit to "proceeds from purchase contracts". Some items purchased through this method however, may not be capitalized as new equipment if the value of an individual item such as a desktop computer does not meet or exceed the District's capitalization threshold.

#### Debt Service Requirements to Maturity – Debt Certificates and Purchase Contracts

Annual debt service requirements to maturity for debt certificates and purchase contracts to be paid from the Transportation Fund and the Debt Service Fund through transfers from the General Fund and for each of the next five fiscal years and in five-year increments thereafter are as follows:

Due in		Debt Ce	ertificates			Purchase	Cor	Total		
Fiscal Year		Principal		Interest		Principal		Interest	D	ebt Service
2016	\$	413.189	\$	21.981	\$	1,808,876	\$	63,586	\$	2,307,632
2017	Ŧ	415,822	Ŧ	19,348	Ŧ	1,413,085	Ŧ	36,736	Ŧ	1,884,991

## Notes to Basic Financial Statements

## Note 5. Long-Term Obligations (Continued)

#### Legal Debt Margin

As of June 30, 2015, the legal debt limit of the District was \$561,683,025, based upon 13.8% percent of its 2014 equalized assessed valuation of \$4,070,166,849. The debt limit less outstanding debt subject to the debt limit of \$327,670,360 plus amounts held in the Debt Service Fund of \$23,941,233, results in a legal debt margin of \$257,953,898 as of June 30, 2015.

## **Compensated Absences**

The District offers sick, personal and in some cases vacation days to its employees. Depending on the union status of the District's employees the number of sick, personal and vacation days provided each year may differ.

The District provides up to 20 vacation days per year, most of which must be used by August 31st of the following year. Some vacation days may be used up until October 31st of the following year depending on the employee union. The District provides up to 3 personal days per year to its employees. Personal balances left over at the end of the year are carried forward into the sick day balance for the next year. The District also offers up to 14 sick days per year. Accumulated personal and sick days are not paid out upon termination. If an employee is vested in the Teachers' Retirement System (TRS) or the Illinois Municipal Retirement Fund (IMRF), the employee is allowed extra service credit based on unused sick days. Since accrued personal and sick days are not paid out upon termination, the District does not accrue a payable for these days at year-end. Based on accumulated vacation days as of year-end, the District's maximum liability for accumulated vacation days to be paid upon its employees' termination was calculated to be \$777,462 at June 30, 2015. The amounts will be paid from the General Fund within the next year.

#### Net Pension Liability

Net Pension Liability of \$80,333,394 at June 30, 2015 represents the District's share of pension liability to plan members for benefits provided through defined benefit pension plans (see Note 7). \$30,825,052 relates to IMRF and will be paid from the Municipal Retirement/Social Security Fund. \$49,508,342 relates to TRS and will be paid from the General Fund.

#### Other Postemployment Benefits Obligation

Other postemployment benefits (OPEB) payable represent the long-term portion of the actuarially determined net OPEB obligation for healthcare insurance for eligible retirees and their dependents through the District's group health insurance plan (see Note 8). The District's OPEB obligation at June 30, 2015 was \$6,398,035 and will be paid from the General Fund.

## Debt Refunding

On February 18, 2015, in conjunction with the issuance of the series 2015A bonds, the District partially advance refunded \$9,020,000 of the series 2012B general obligation bonds by placing a portion of the proceeds of the series 2015A bonds in an irrevocable trust to provide for all future debt service payments on the advanced refunded debt. Accordingly, the trust account assets and the liability for the defeased debt are not included in the District's financial statements.

The refunding transaction described in the preceding paragraph resulted in an economic loss of \$4,083,274 and had a net effect of extending the life of the bonds by eight years while increasing the District's future debt service requirements by \$6,514,727.

#### Notes to Basic Financial Statements

## Note 5. Long-Term Obligations (Continued)

## Debt Refunding (Continued)

On February 18, 2015, in conjunction with the issuance of the series 2015B bonds, the District partially advance refunded \$9,230,000 of the series 2011A general obligation bonds by placing a portion of the proceeds of the series 2015B bonds in an irrevocable trust to provide for all future debt service payments on the advanced refunded debt. Accordingly, the trust account assets and the liability for the defeased debt are not included in the District's financial statements.

The refunding transaction described in the preceding paragraph resulted in an economic loss of \$1,175,047 and had a net effect of extending the life of the bonds by seven years while increasing the District's future debt service requirements by \$4,628,519.

On February 18, 2015, in conjunction with the issuance of the series 2015C bonds, the District fully advance refunded the outstanding series 2005 general obligation bonds of \$21,025,000. A portion of the proceeds of the series 2015C bonds were placed in an irrevocable trust to provide for all future debt service payments on the advanced refunded debt. Accordingly, the trust account assets and the liability for the defeased debt are not included in the District's financial statements.

The refunding transaction described in the preceding paragraph resulted in an economic gain \$1,551,359 and did not extend the life of the bonds while reducing the District's future debt service requirements by \$1,721,016.

On February 18, 2015, in conjunction with the issuance of the series 2015D bonds, the District partially advance refunded principal of \$4,054,785 and accreted interest of \$4,605,215 from the series 2001 capital appreciation bonds; principal of \$24,176,417 and accreted interest of \$33,663,583 from the series 2002 capital appreciation bonds; principal of \$21,578,261 and accreted interest of \$36,321,739 from the series 2003B capital appreciation bonds by placing a portion of the proceeds of the series 2015D bonds in an irrevocable trust to provide for all future debt service payments on the advanced refunded debt. Accordingly, the trust account assets and the liability for the defeased debt are not included in the District's financial statements.

The refunding transaction described in the preceding paragraph resulted in an economic loss of \$11,846,224 and had a net effect of extending the life of the bonds by 12 years while increasing the District's future debt service requirements by \$52,084,600.

As of June 30, 2015, the outstanding balance of all defeased bonds totaled \$152,940,000.

## **Notes to Basic Financial Statements**

#### Note 6. Risk Management

The District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The District is self-insured for the above risks. For property related risks, the District maintains excess insurance coverage to cover claims in excess of \$100,000 per occurrence to a maximum of \$250,000,000. The amount of coverage has not decreased nor have the amount of settlements exceeded coverage in any of the past three fiscal years. For workers' compensation risks, the District maintains excess insurance coverage to cover claims in excess of \$400,000 per occurrence to a maximum of \$1,000,000. The amount of coverage has not decreased nor have the amount of settlements exceeded coverage in any of the past three fiscal years.

The District is also self-insured for medical claims to cover its employees and their qualifying dependents. The District funds a self-insurance account and has engaged an outside agency to administer its medical claims. The District does not assume unlimited liability for medical claims. As of June 30, 2015, the District had purchased (stop-loss) insurance to cover claims in excess of \$500,000 per person per year and \$2,000,000 lifetime. Estimated claims incurred but not yet submitted by insurers were estimated based on historical trends as provided by the District's third party administrator. Estimated insurance claims incurred but not reported (IBNR) liabilities at June 30, 2015, total \$9,987,471 and claims payable totaled \$5,485,779. Settled claims have not exceeded coverage in any of the past three fiscal years. Claim liabilities are calculated considering the effects of inflation, recent claim settlement trends including frequency and amount of payouts, and other economic and societal factors. Changes in the balances of claims liabilities during the past two fiscal years are as follows:

		ear Ended ie 30,
	Total 2015	Total 2014
Claims liability - beginning Incurred claims Claim payments and reductions	\$ 17,787,137 52,291,773 54,605,660	\$ 19,610,288 51,731,317 53,554,468
Claims liability - ending	<u>\$ 15,473,250</u>	\$ 17,787,137

#### Notes to Basic Financial Statements

## Note 7. Employee Retirement Systems and Plans

#### Teachers' Retirement System

#### Plan Description

The District (employer) participates in the Teachers' Retirement System of the State of Illinois (TRS or the System). TRS is a cost-sharing multiple-employer defined benefit pension plan that was created by the Illinois legislature for the benefit of Illinois public school teachers employed outside the city of Chicago. TRS members include all active nonannuitants who are employed by a TRS-covered employer to provide services for which teacher licensure is required. The Illinois Pension Code outlines the benefit provisions of TRS, and amendments to the plan can be made only by legislative action with the Governor's approval. The TRS Board of Trustees is responsible for the System's administration.

TRS issues a publicly available financial report that can be obtained at **http://trs.illinois.gov/pubs/cafr**; by writing to TRS at 2815 W. Washington, PO Box 19253, Springfield, IL 62794; or by calling (888) 877-0890, option 2.

#### Benefits Provided

TRS provides retirement, disability, and death benefits. Tier I members have TRS or reciprocal system service prior to January 1, 2011. Tier I members qualify for retirement benefits at age 62 with five years of service, at age 60 with 10 years, or age 55 with 20 years. The benefit is determined by the average of the four highest years of creditable earnings within the last 10 years of creditable service and the percentage of average salary to which the member is entitled. Most members retire under a formula that provides 2.2 percent of final average salary up to a maximum of 75 percent with 34 years of service. Disability and death benefits are also provided.

Tier II members qualify for retirement benefits at age 67 with 10 years of service, or a discounted annuity can be paid at age 62 with 10 years of service. Creditable earnings for retirement purposes are capped and the final average salary is based on the highest consecutive eight years of creditable service rather than the last four. Disability provisions for Tier II are identical to those of Tier I. Death benefits are payable under a formula that is different from Tier I.

Essentially all Tier I retirees receive an annual 3 percent increase in the current retirement benefit beginning January 1 following the attainment of age 61 or on January 1 following the member's first anniversary in retirement, whichever is later. Tier II annual increases will be the lesser of three percent of the original benefit or one-half percent of the rate of inflation beginning January 1 following attainment of age 67 or on January 1 following the member's first anniversary in retirement, whichever is later.

#### Contributions

The state of Illinois maintains the primary responsibility for funding TRS. The Illinois Pension Code, as amended by Public Act 88-0593 and subsequent acts, provides that for years 2010 through 2045, the minimum contribution to the System for each fiscal year shall be an amount determined to be sufficient to bring the total assets of the System up to 90 percent of the total actuarial liabilities of the System by the end of fiscal year 2045.

Contributions from active members and TRS contributing employers are also required by the Illinois Pension Code. The contribution rates are specified in the pension code. The active member contribution rate for the year ended June 30, 2015, was 9.4 percent of creditable earnings. The member contribution, which may be paid on behalf of employees by the employer, is submitted to TRS by the employer.

## On behalf contributions to TRS

The State of Illinois makes employer pension contributions on behalf of the employer. For the year ended June 30, 2015, state of Illinois contributions recognized by the employer were based on the state's proportionate share of the collective net pension liability associated with the employer, and the employer recognized revenue and expenditures of \$94,512,761 in pension contributions from the State of Illinois.

#### Notes to Basic Financial Statements

## Note 7. Employee Retirement Systems and Plans (Continued)

#### Teachers' Retirement System (Continued)

#### 2.2 formula contributions

Employers contribute 0.58 percent of total creditable earnings for the 2.2 formula change. The contribution rate is specified by statute. Contributions for the year ended June 30, 2015, were \$1,149,900, and are deferred because they were paid after the June 30, 2014 measurement date.

#### Federal and special trust fund contributions

When TRS members are paid from federal and special trust funds administered by the employer, there is a statutory requirement for the employer to pay an employer pension contribution from those funds. Under a policy adopted by the TRS Board of Trustees that has been in effect since the fiscal year ended June 30, 2006, employer contributions for employees paid from federal and special trust funds will be the same as the state contribution rate to TRS. Public Act 98-0674 now requires the two rates to be the same.

For the year ended June 30, 2015, the employer pension contribution was 33.00 percent of salaries paid from federal and special trust funds. For the year ended June 30, 2015, salaries totaling \$3,598,192 were paid from federal and special trust funds that required employer contributions of \$1,187,403. These contributions are deferred because they were paid after the June 30, 2014 measurement date.

#### Employer retirement cost contributions

Under GASB Statement No. 68, contributions that an employer is required to pay because of a TRS member retiring are categorized as specific liability payments. The employer is required to make a one-time contribution to TRS for members retiring under the Early Retirement Option (ERO). The payments vary depending on the member's age and salary. The maximum employer ERO contribution under the current program is 146.5 percent and applies when the member is age 55 at retirement. For the year ended June 30, 2015, the employer paid \$750,408 to TRS for employer ERO contributions.

The employer is also required to make a one-time contribution to TRS for members granted salary increases over 6 percent if those salaries are used to calculate a retiree's final average salary. A one-time contribution is also required for members granted sick leave days in excess of the normal annual allotment if those days are used as TRS service credit. For the year ended June 30, 2015, the employer paid \$52,467 to TRS for employer contributions due on salary increases in excess of 6 percent and \$2,883 for sick leave days granted in excess of the normal annual allotment.

# Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At June 30, 2015, the employer reported a liability for its proportionate share of the net pension liability (first amount shown below) that reflected a reduction for state pension support provided to the employer. The state's support and total are for disclosure purposes only. The amount recognized by the employer as its proportionate share of the net pension liability, the related state support, and the total portion of the net pension liability that was associated with the employer were as follow:

Employer's proportionate share of the net pension liability	\$ 49,508,342
State's proportionate share of the net pension liability associated with the employer	1,173,916,748
Total	\$ 1,223,425,090

## **Notes to Basic Financial Statements**

## Note 7. Employee Retirement Systems and Plans (Continued)

## Teachers' Retirement System (Continued)

# Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions (Continued)

The net pension liability was measured as of June 30, 2014, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of June 30, 2013, and rolled forward to June 30, 2014. The employer's proportion of the net pension liability was based on the employer's share of contributions to TRS for the measurement year ended June 30, 2014, relative to the projected contributions of all participating TRS employers and the state during that period. At June 30, 2014, the employer's proportion was 0.0814 percent.

The net pension liability as of the beginning of this first measurement period under GASB Statement No. 68 was measured as of June 30, 2013, and the total pension liability was based on the June 30, 2013, actuarial valuation without any roll-up. The employer's proportion of the net pension liability as of June 30, 2013, was based on the employer's share of contributions to TRS for the measurement year ended June 30, 2013, relative to the projected contributions of all participating TRS employers and the state during that period. At June 30, 2013, the employer's proportion was 0.0967 percent.

For the year ended June 30, 2015, the employer recognized pension expense of \$96,541,204 and revenue of \$94,512,761 for support provided by the state. At June 30, 2015, the employer reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	erred Outflows Resources	Deferred Inflows of Resources
Differences between expected and actual experience Net difference between projected and actual earnings	\$ 26,152	\$-
on pension plan investments Changes of assumptions	-	2,488,171
Changes in proportion and differences between employer contributions and proportionate share of contributions	-	- 7,742,446
Employer contribution subsequent to the measurement date	2,337,303	-
Total deferred amounts related to pensions	\$ 2,363,455	\$ 10,230,617

#### **Notes to Basic Financial Statements**

## Note 7. Employee Retirement Systems and Plans (Continued)

## Teachers' Retirement System (Continued)

# Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions (Continued)

Of the amounts reported as deferred outflows of resources related to pensions resulting from employer contributions subsequent to the measurement date, \$2,337,303 will be recognized as a reduction of the net pension liability in the reporting year ended June 30, 2016. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year ended June 30:

2016	\$ 2,494,930
2017	2,494,930
2018	2,494,930
2019	2,494,930
2020	224,745
Total deferred inflows related to pensions	\$ 10,204,465

#### Actuarial Assumptions

The total pension liability in the June 30, 2014 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3.00 percent
Salary increases	5.75 percent, average, including inflation
Investment rate of return	7.50 percent, net of pension plan investment expense, including inflation

Mortality rates were based on the RP-2000 White Collar Table with projections using scale AA that vary by member group.

For GASB disclosure purposes, the actuarial assumptions for the years ended June 30, 2014 and 2013 were assumed to be the same. However, for funding purposes, the actuarial valuations for those two years were different. The actuarial assumptions used in the June 30, 2014 valuation were based on updates to economic assumptions adopted in 2014 which lowered the investment return assumption from 8.0 percent to 7.5 percent. The salary increase and inflation assumptions were also lowered. The actuarial assumptions used in the June 30, 2013 valuation were based on the 2012 actuarial experience analysis and first adopted in the June 30, 2012 valuation. The investment return assumption was lowered from 8.5 percent to 8.0 percent and the salary increase and inflation assumptions were also lowered. Mortality assumptions were adjusted to anticipate continued improvement in mortality.

## **Notes to Basic Financial Statements**

## Note 7. Employee Retirement Systems and Plans (Continued)

## Teachers' Retirement System (Continued)

#### Actuarial Assumptions (Continued)

The long-term expected rate of return on pension plan investments was determined using a buildingblock method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The target allocation and best estimates of arithmetic real rates of return for each major asset class that were used by the actuary are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
U.S. large cap	18 %	8.23 %
Global equity excluding U.S.	18	8.58
Aggregate bonds	16	2.27
U.S. TIPS	2	3.52
NCREIF	11	5.81
Opportunistic real estate	4	9.79
ARS	8	3.27
Risk party	8	5.57
Diversified inflation strategy	1	3.96
Private equity	14	13.03
Total	<u>    100  </u> %	

#### Discount Rate

The discount rate used to measure the total pension liability was 7.50 percent. The projection of cash flows used to determine the discount rate assumed that employee contributions, employer contributions, and state contributions will be made at the current statutorily-required rates.

Based on those assumptions, TRS's fiduciary net position was projected to be available to make all projected future benefit payments of current active and inactive members and all benefit recipients. Tier I's liability is partially-funded by Tier II members, as the Tier II member contribution is higher than the cost of Tier II benefits. Due to this subsidy, contributions from future members in excess of the service cost are also included in the determination of the discount rate. Therefore, the long-term expected rate of return on TRS investments was applied to all periods of projected benefit payments to determine the total pension liability.

## Notes to Basic Financial Statements

## Note 7. Employee Retirement Systems and Plans (Continued)

## Teachers' Retirement System (Continued)

# Sensitivity of the Employer's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate

The following presents the employer's proportionate share of the net pension liability calculated using the discount rate of 7.5 percent, as well as what the employer's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.5 percent) or 1-percentage-point higher (8.5 percent) than the current rate.

	Current		
	1% Decrease	Discount Rate	1% Increase
	6.5%	7.5%	8.5%
Employer's proportionate share of the			
net pension liability	\$ 61,140,372	\$ 49,508,342	\$39,875,694

#### TRS fiduciary net position

Detailed information about the TRS's fiduciary net position as of June 30, 2014 is available in the separately issued TRS *Comprehensive Annual Financial Report*.

#### Teachers' Health Insurance Security Fund

The employer participates in the Teacher Health Insurance Security (THIS) Fund, a cost-sharing, multiple-employer defined benefit post-employment healthcare plan that was established by the Illinois legislature for the benefit of retired Illinois public school teachers employed outside the city of Chicago. The THIS Fund provides medical, prescription, and behavioral health benefits, but it does not provide vision, dental, or life insurance benefits to annuitants of the Teachers' Retirement System (TRS). Annuitants not enrolled in Medicare may participate in the state-administered participating provider option plan or choose from several managed care options. Annuitants who are enrolled in Medicare Parts A and B may be eligible to enroll in a Medicare Advantage plan.

The State Employees Group Insurance Act of 1971 (5 ILCS 375) outlines the benefit provisions of the THIS Fund and amendments to the plan can be made only by legislative action with the Governor's approval. Effective July 1, 2012, in accordance with Executive Order 12-01, the plan is administered by the Illinois Department of Central Management Services (CMS) with the cooperation of TRS. Section 6.6 of the State Employees Group Insurance Act of 1971 requires all active contributors to TRS who are not employees of the state to make a contribution to the THIS Fund.

The percentage of employer required contributions in the future will not exceed 105 percent of the percentage of salary actually required to be paid in the previous fiscal year.

- On behalf contributions to the THIS Fund from the state The State of Illinois makes employer retiree health insurance contributions on behalf of the employer. State contributions are intended to match contributions to the THIS Fund from active members which were 1.02 percent of pay during the year ended June 30, 2015. State of Illinois contributions were \$2,022,238, and the employer recognized revenue and expenditures of this amount during the year.
- Employer contributions to the THIS Fund The employer also makes contributions to the THIS Fund. The employer THIS Fund contribution was 0.76 percent during the year ended June 30, 2015. For the year ended June 30, 2015, the employer paid \$1,506,765 to the THIS Fund, which was 100 percent of the required contribution.

#### Notes to Basic Financial Statements

## Teachers' Health Insurance Security Fund (Continued)

#### Further information on the THIS Fund

The publicly available financial report of the THIS Fund may be found on the website of the Illinois Auditor General: http://www.auditor.illinois.gov/Audit-Reports/ABC-List.asp. The current reports are listed under "Central Management Services." Prior reports are available under "Healthcare and Family Services."

#### Illinois Municipal Retirement Fund

#### Plan Description

The District's defined benefit pension plan for regular employees provides retirement and disability benefits, post-retirement increases, and death benefits to plan members and beneficiaries. The District's plan is managed by the Illinois Municipal Retirement Fund ("IMRF"), the administrator of a multiemployer public pension fund. A summary of IMRF's pension benefits is provided in the "Benefits Provided" section below. Details of all benefits are available from IMRF. Benefit provisions are established by statute and may only be changed by the General Assembly of the State of Illinois. IMRF issues a publicly available Comprehensive Annual Financial Report that includes financial statements, detailed information about the pension plan's fiduciary net position, and required supplementary information. The report is available for download at www.imrf.org.

#### **Benefits Provided**

The District participates in the Regular Plan ("RP"). Employees hired *before* January 1, 2011, are eligible for Tier 1 benefits. Tier 1 employees are vested for pension benefits when they have at least eight years of qualifying service credit. Tier 1 employees who retire at age 55 (at reduced benefits) or after age 60 (at full benefits) with eight years of service are entitled to an annual retirement benefit, payable monthly for life, in an amount equal to 1-2/3% of the final rate of earnings for the first 15 years of service credit, plus 2% for each year of service credit after 15 years to a maximum of 75% of their final rate of earnings. Final rate of earnings is the highest total earnings during any consecutive 48 months within the last 10 years of service, divided by 48. Under Tier 1, the pension is increased by 3% of the original amount on January 1 every year after retirement.

Employees hired *on or after* January 1, 2011, are eligible for Tier 2 benefits. For Tier 2 employees, pension benefits vest after ten years of service. Participating employees who retire at age 62 (at reduced benefits) or after age 67 (at full benefits) with ten years of service are entitled to an annual retirement benefit, payable monthly for life, in an amount equal to 1-2/3% of the final rate of earnings for the first 15 years of service credit, plus 2% for each year of service credit after 15 years to a maximum of 75% of their final rate of earnings. Final rate of earnings is the highest total earnings during any 96 consecutive months within the last 10 years of service, divided by 96. Under Tier 2, the pension is increased on January 1 every year after retirement, upon reaching age 67, by the *lesser* of:

- 3% of the original pension amount, or
- 1/2 of the increase in the Consumer Price Index of the original pension amount.

#### **Notes to Basic Financial Statements**

#### Note 7. Employee Retirement Systems and Plans (Continued)

#### Illinois Municipal Retirement Fund (Continued)

#### **Employees Covered by Benefit Terms**

As of December 31, 2014, the following employees were covered by the benefit terms:

Retirees and Beneficiaries currently receiving benefits Inactive Plan Members entitled to but not yet receiving benefits	1,086 1,719
Active Plan Members	1,900
Total	4,705

#### Contributions

As set by statute, the District's Regular Plan Members are required to contribute 4.5% of their annual covered salary. The statute requires employers to contribute the amount necessary, in addition to member contributions, to finance the retirement coverage of its own employees. The District's annual contribution rates for calendar years 2015 and 2014 were 11.41% and 12.05%, respectively. For the fiscal year ended June 30, 2015, the District contributed \$6,872,923 to the plan. The District also contributes for disability benefits, death benefits, and supplemental retirement benefits, all of which are pooled at the IMRF level. Contribution rates for disability and death benefits are set by IMRF's Board of Trustees, while the supplemental retirement benefits rate is set by statute.

#### Net Pension Liability

The District's net pension liability was measured as of December 31, 2014. The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date.

#### Actuarial Assumptions

The following are the methods and assumptions used to determine total pension liability at December 31, 2014:

- The Actuarial Cost Method used was Entry Age Normal.
- The Asset Valuation Method used was Market Value of Assets.
- The Inflation Rate was assumed to be 3.5%.
- **Salary Increases** were expected to be 3.75% to 14.50%, including inflation.
- The **Investment Rate of Return** was assumed to be 7.48%.
- **Projected Retirement Age** was from the Experience-based Table of Rates, specific to the type of eligibility condition, last updated for the 2014 valuation according to an experience study from years 2011 to 2013.
- The IMRF-specific rates for **Mortality** (for non-disabled retirees) were developed from the RP-2014 Blue Collar Health Annuitant Mortality Table with adjustments to match current IMRF experience.
- For Disabled Retirees, an IMRF-specific mortality table was used with fully generational projection scale MP-2014 (base year 2014). The IMRF-specific rates were developed from the RP-2014 Disabled Retirees Mortality Table, applying the same adjustments that were applied for non-disabled lives.
- For Active Members, an IMRF-specific mortality table was used with fully generational projection scale MP-2014 (base year 2014). The IMRF-specific rates were developed from the RP-2014 Employee Mortality Table with adjustments to match current IMRF experience.

## **Notes to Basic Financial Statements**

## Note 7. Retirement Fund Commitments (Continued)

## Illinois Municipal Retirement Fund (Continued)

#### Actuarial Assumptions (Continued)

The long-term expected rate of return on pension plan investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return (expected returns, net of pension plan investment expense, and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return to the target asset allocation percentage and adding expected inflation. The target allocation and best estimates of geometric real rates of return for each major asset class are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Domestic Equity	38	% 7.60 %
International Equity	17	7.80
Fixed Income	27	3.00
Real Estate	8	6.15
Alternative Investments	9	5.25 - 8.50
Cash Equivalents	1	2.50
Total	100	%

#### Discount Rate

A Single Discount Rate of 7.48% was used to measure the total pension liability. The projection of cash flow used to determine this Single Discount Rate assumed that the plan members' contributions will be made at the current contribution rate, and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. The Single Discount Rate reflects:

- 1. The long-term expected rate of return on pension plan investments (during the period in which the fiduciary net position is projected to be sufficient to pay benefits), and
- 2. The tax-exempt municipal bond rate based on an index of 20-year general obligation bonds with an average AA credit rating (which is published by the Federal Reserve) as of the measurement date (to the extent that the contributions for use with the long-term expected rate of return are not met).

For the purpose of the most recent valuation, the expected rate of return on plan investments is 7.50%, the municipal bond rate is 3.56% (based on the weekly rate closest to but not later than the measurement date of the 20-Year Bond Buyer Index as published by the Federal Reserve), and the resulting single discount rate is 7.48%.

#### **Notes to Basic Financial Statements**

# Pension Expense, Deferred Outflows of Resources, and Deferred Inflows of Resources Related to Pensions

For the year ended June 30, 2015, the District recognized pension expense of \$7,766,713. At June 30, 2015, the District reported deferred outflows or resources and deferred inflows of resources related to pensions from the following sources:

	ferred Outflows of Resources	rred Inflows Resources
Differences between expected and actual experience Net difference between projected and actual earnings	\$ 674,150	\$ -
on pension plan investments	2,632,418	-
Changes of assumptions	6,978,119	-
Changes in proportion and differences between employer		
contributions and proportionate share of contributions	-	-
Employer contribution subsequent to the measurement date	 3,742,422	-
Total deferred amounts related to pensions	\$ 14,027,109	\$ -

Of the amounts reported as deferred outflows of resources related to pensions resulting from employer contributions subsequent to the measurement date, \$3,742,422 will be recognized as a reduction of the net pension liability in the reporting year ended June 30, 2016. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follows:

Year ended June 30:

\$ 3,407,752
3,407,752
2,811,079
 658,104
\$ 10,284,687
\$

#### **Notes to Basic Financial Statements**

#### Note 8. Other Postemployment Benefits

The District had an actuarial valuation performed to determine its liability for other postemployment benefits (OPEB) as of July 1, 2013. According to GASB 45, an actuarial valuation should be performed at a minimum frequency of every two years for a plan the size of the District's.

## Plan Description

The District administers a single-employer defined benefit healthcare plan, the "Retiree Healthcare Plan" or "the Plan". The Plan provides healthcare insurance for eligible retirees and their dependents through the District's group health insurance plan, which covers both active and retired members. Benefit provisions are established through negotiations between the District and the unions representing District employees and are renegotiated each bargaining period. Certain retirees are eligible until the first month of Medicare eligibility and others are eligible for their lifetime. The Plan does not issue a stand-alone financial report.

## Funding Policy

Contribution requirements are also negotiated between the District and union representatives. All plan funding is done on a pay-as-you-go basis. Funding varies from 0 percent to 100 percent, depending on the retiree's status at the time of retirement. Currently, the current and retired employees pay a specified blended premium rate for healthcare insurance and the District pays the difference. For fiscal year 2015, the District contributed \$1,669,959 to the Plan. Plan members receiving benefits contributed \$267,342, or approximately 13.8 percent of the total premiums.

## Annual OPEB Cost and Net OPEB Obligation

The District's annual OPEB cost (expense) is calculated based on the annual required contribution of the employer (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and to amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. The following table shows the components of the District's annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the District's net OPEB obligation:

	Government-Wide Activities		
Annual required contribution	\$	2,563,258	
Interest on net OPEB obligation		291,235	
Adjustment to annual required contribution		(343,859)	
Annual OPEB cost		2,510,634	
Contributions made		1,937,301	
Increase in net OPEB obligation Net OPEB obligation - beginning of year		573,333 5,824,702	
Net OPEB obligation - end of year	\$	6,398,035	

#### **Notes to Basic Financial Statements**

#### Note 8. Other Postemployment Benefits (Continued)

## Annual OPEB Cost and Net OPEB Obligation (Continued)

The District's annual OPEB cost, the percentage of annual OPEB cost contributed to the plan, and the net OPEB obligation for 2015 and the preceding two years were as follows:

Year	Annual	Percentage	Net
Ending	OPEB	of APC	OPEB
June 30,	Cost (APC)	Contributed	Obligation
2015	\$ 2,510,634	77.2% \$	6,398,035
2014	2,490,224	83.6	5,824,702
2013	3,197,487	61.8	5,416,500

The District has reported the net OPEB obligation of \$6,398,035 in the statement of net position. Payments to liquidate the liability have typically been made by the General Fund.

#### Funded Status and Funding Progress

As of July 1, 2013, the date of the most recent valuation, the actuarial accrued liability for benefits was \$22,606,948, all of which was unfunded. The covered payroll (annual payroll of active employees covered by the plan) was \$236,945,103 and the ratio of the unfunded actuarial accrued liability to the covered payroll was 9.54%.

The projection of future benefit payments for an ongoing plan involves estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the District are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The schedule of funding progress, presented as required supplementary information following the notes to basic financial statements, presents only one valuation, however, in subsequent years, multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liabilities for benefits will be provided.

#### Notes to Basic Financial Statements

## Note 8. Other Postemployment Benefits (Continued)

#### Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the District and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The methods and assumptions used include techniques that are designed to reduce the effects of short-term volatility in actuarial accrued liabilities, consistent with the long-term perspective of the calculations.

Significant methods and assumptions were as follows:

Actuarial valuation date:	July 1, 2013
Actuarial cost method:	Unit Credit Cost Method
Amortization method:	Closed, Level Dollar Method
Remaining amortization period:	30 years
Actuarial assumptions:	
Discount Rate	5.0%
Healthcare Trend Rate	Beginning at 8.0%, trending to 5.0%

#### Note 9. Other Financial Disclosures

## **Expenditures Exceeding Operating Budgets**

Expenditures exceeded budgeted expenditures in the following funds during fiscal year 2015:

	Final	Actual	Amount
Fund	Budget	Expenditures	Over Budget
General Fund	\$ 469,671,510	\$ 487,631,726	\$17,960,216
Transportation Fund	24,734,158	25,025,606	291,448
Debt Service Fund	42,882,289	45,211,691	2,329,402
Fire Prevention and Safety Fund	1,715,609	2,058,006	342,397

#### Interfund Transfers

During 2015, the District transferred \$1,027,463 from the General Fund to the Debt Service Fund to provide resources to pay principal and interest on debt certificates and purchase contracts. The General Fund also transferred \$158,343 to the Transportation Fund for the purpose of financing transportation related expenses. The Transportation Fund transferred \$173,335 to the General Fund to finance utilities and building maintenance related expenditures.

#### **Notes to Basic Financial Statements**

## Note 9. Other Financial Disclosures (Continued)

## Due To/From Other Funds

Interfund debt balances as of June 30, 2015 are as follows:

	Due From	Due To
Fund	Other Funds	Other Funds
Major governmental funds		
General	\$ 13,830,418	3 \$ -
Transportation	-	13,503,494
Nonmajor Governmental Funds		326,924
Total	\$ 13,830,418	3 \$ 13,830,418

The interfund balances reflect loans to be used as resources for current operating expenditures which are expected to be repaid in the following fiscal year.

#### Deficit Fund Balances

The Transportation Fund had a deficit fund balance as of June 30, 2015 of (\$10,225,941). District management expects to reduce this deficit with future revenues and budget cuts.

The Fire Prevention and Safety Fund had a deficit fund balance as of June 30, 2015 of (\$1,211,399). District management expects to reduce this deficit with future revenues.

## Note 10. Contingent Liabilities

#### Litigation

The District is a defendant in various lawsuits wherein substantial amounts are claimed. In the opinion of the District's legal counsel, these suits are without substantial merit and should not result in judgments, which in aggregate would have a material adverse effect on the District's financial statements.

#### Grants

Amounts received or receivable from grantor agencies are subject to audit and adjustment by grantor agencies, principally the federal government and the Illinois State Board of Education. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amount, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time. However, in the opinion of management, any such disallowed claims will not have a material adverse effect on the overall financial position of the District at June 30, 2015.

## Notes to Basic Financial Statements

#### Note 11. Commitments

At June 30, 2015, the District had approximately \$10.6 million in outstanding construction project commitments. The projects were comprised of work to be done at various school buildings to be paid from the Fire Prevention and Safety Fund and the Capital Projects Fund.

#### Note 12. Restatement for Implementation of New Accounting Standards

The GASB has issued Statement No. 68, Accounting and Financial Reporting for Pensions, an Amendment of GASB Statement No. 27 (GASB 68) and GASB Statement No. 71, Pension Transition for Contributions Made Subsequent to Measurement Date – An Amendment of GASB Statement No. 68 (GASB 71), which was adopted by the District for the year ended June 30, 2015. GASB No. 68 requires governments providing defined benefit pensions to recognize their long-term obligation for pension benefits as a liability for the first time, and to more comprehensively and comparably measure the annual costs of pension benefits. In accordance with GASB No.'s 68 and 71, the District now reports a net pension liability on its financial statements, as well as deferred outflows of resources and deferred inflows of resources resulting from the pension standards. In addition, the impact of implementing these statements resulted in a restatement of the beginning net position for governmental activities to record the net pension liability, and deferred inflows and outflows of resources related to pensions.

The District's net position at June 30, 2014 has been restated as follows:

	G	overnmental Activities
Net Position, June 30, 2014, as previously stated Implementation of new GASB standards	\$	169,577,480 (73,097,786)
Net Position, June 30, 2014 as restated	\$	96,479,694

#### Note 13. Authoritative Pronouncements Issued But Not Yet Adopted

The following is a description of other GASB authoritative pronouncements, which have been issued but not yet adopted by the District:

Statement No. 72, *Fair Value Measurement and Application*, will be effective for the District beginning with its year ending June 30, 2016. This statement addresses accounting and financial reporting issues related to fair value measurements. The definition of fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. This statement also provides guidance for applying fair value to certain investments and disclosures related to all fair value measurements.

Statement No. 73, Accounting and Financial Reporting for Pension and Related Assets That Are Not Within the Scope of GASB Statement No. 68, and Amendments to Certain Provision of GASB Statement Nos. 67 and 68, will be effective for the District beginning with its year ending June 30, 2016, except those provisions that address employers and governmental nonemployer contributing entities for pensions that are not within the scope of GASB Statement No. 68, which are effective for the District beginning with its year ending June 30, 2017. This statement will establish requirements for those pension and pension plans that are not administered through a trust meeting specified criteria.

#### Notes to Basic Financial Statements

## Note 13. Authoritative Pronouncements Issued But Not Yet Adopted (Continued)

Statement No. 74, *Financial Reporting for Postemployment Benefits Other Than Pension Plans,* will be effective for the District beginning with its year ending June 30, 2017. This statement addresses the financial reports of defined benefit OPEB plans that are administered through trusts that meet specified criteria.

Statement No. 75, Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions (Employer), will be effective for the District beginning with its year ending June 30, 2018. This statement requires governments to report a liability on the face of the financial statements for the OPEB they provide and requires governments in all types of OPEB plans to report more extensive note disclosures and required supplementary information about their OPEB liabilities.

Statement No. 76, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments,* will be effective for District beginning with its year ending June 30, 2016. This statement reduces the GAAP hierarchy to two categories of authoritative GAAP from the four categories under GASB Statement No. 55, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments.* The first category of authoritative GAAP consists of GASB Statements of Government Accounting Standards. The second category comprises GASB Technical Bulletins and Implementation Guides, as well as guidance from the AICPA that is cleared by the GASB. The statement also addresses the use of authoritative and nonauthorized literature in the event that the accounting treatment for a transaction or other event is not specified within a source of authoritative GAAP.

Statement No. 77, *Tax Abatement Disclosures*, will be effective for the District beginning with its year ending June 30, 2017. This statement requires state and local governments, for the first time, to disclose information about tax abatement agreements. It requires governments to disclose information about their own tax abatements separately from information about tax abatements that are entered into by other governments and reduce the reporting government's tax revenues.

Management has not currently determined what impact, if any, these Statements may have on its financial statements.

#### Note 14. Subsequent Event

On October 8, 2015 the Society of Actuaries (SOA) released an updated Mortality Improvement Scale MP-2015. The SOA's preliminary estimates suggest that updating this recently released scale might reduce a plan's liabilities up to two percent. Management has not yet evaluated the impact of this recent update with their actuary and accordingly no adjustments have been made to the District's retirement plan obligations.

#### **Notes to Schedules**

#### Changes of Assumptions

Amounts reported in 2014 reflect an investment rate of return of 7.5 percent, an inflation rate of 3.0 percent and real return of 4.5 percent, and a salary increase assumption of 5.75 percent. In 2013, assumptions used were an investment rate of return of 8.0 percent, an inflation rate of 3.25 percent and real return of 4.75 percent, and salary increases of 6.00 percent. However, the total pension liability at the beginning and end of the year was calculated using the same assumptions, so the difference due to actuarial assumptions was not calculated or allocated.

## Schedule of Changes in the Net Pension Liability and Related Ratios - Illinois Municipal Retirement Fund

#### Notes to Schedule of Contributions

Summary of Actuarial Methods and Assumptions Used in the Calculation of the 2014 Contribution Rate\*

## Valuation Date

Notes

Actuarial determined contribution rates are calculated as of December 31 each year, which are 12 months prior to the beginning of the fiscal year in which contributions are reported.

#### Methods and Assumptions Used to Determine 2014 Contribution Rate

Actuarial Cost Method:	Aggregate entry age = normal
Amortization Method:	Level percentage of payroll, closed
Remaining Amortization Period:	29-year closed period
Asset Valuation Method:	5-year smoothed market; 20% corridor
Wage Growth:	4%
Price Inflation:	3%, approximate; No explicit price inflation assumption is used in this valuation.
Salary Increases:	4.40% to 16%, including inflation
Investment Rate of Return:	7.50%
Retirement Age:	Experienced-based table of rates that are specific to the type of eligibility condition; last updated for the 2011 valuation pursuant to an experience study of the period 2008 to 2012.
Mortality:	RP-2000 Combined Healthy Mortality Table, adjusted for mortality improvements to 2020 using projection scale AA. For men, 120% of the table rates were used. For women, 92% of the table rates were used. For disabled lives, the mortality rates are the rates applicable to non- disabled lives set forward 10 years.
Other Information	
Notes	There were no benefit changes during the year.

\* Based on Valuation Assumptions used in the December 31, 2012 actuarial valuation; note two-year lag between valuation and rate setting.

Schedule of Funding Progress Retiree Healthcare Plan June 30, 2015

07/01/09	-			28,990,310	28,990,310		-	241,088,582	12.02	

The District has elected to have valuations performed biennially.

#### **GENERAL FUND**

The general fund is used to account for resources traditionally associated with government operations which are not required to be accounted for in another fund. The District's general fund consists of four accounts: the *Educational Account*, which records direct costs of instruction and administration; the *Tort Immunity Account*, which is used for the purpose of recording risk financing activities of the District; the *Operations and Maintenance Account*, which reports all costs of maintaining, improving or repairing school buildings and property; and the *Working Cash Account*, which accounts for financial resources held by the District to be used for temporary interfund loans to the Educational Account, the Operations and Maintenance Account, and the Transportation Fund.

#### MAJOR SPECIAL REVENUE FUNDS

Special revenue funds are used to account for revenues from specific taxes or other earmarked revenue sources which by law are designated to finance particular functions or activities of government and which cannot be diverted to other uses. The major special revenue fund maintained by the District is as follows:

Transportation Fund - To account for the revenue and expenditures related to student transportation, both to and from school. Revenue is derived primarily from local property taxes and state reimbursement grants.

#### Schedule of Revenues, Expenditures and Changes in Fund Balance -Budget and Actual General Fund Year Ended June 30, 2015

Year Ended June 30, 2015

## DEBT SERVICE FUND

Debt service funds are used to account for monies accumulated to retire general long-term debt. The debt service fund maintained by the District is as follows:

Debt Service Fund - To account for the periodic payment of principal and interest on the general obligation bond issues and other long-term debt of the District. Sources of funds consist primarily of local property tax revenues and transfers from other funds of the District.

#### NONMAJOR GOVERNMENTAL FUNDS

#### SPECIAL REVENUE FUND

Municipal Retirement Fund - To account for the District's portion of the pension contributions to the Illinois Municipal Retirement Fund for classified employees and social security contributions for applicable certified and classified employees. Revenue to finance the contributions is derived primarily from local property taxes.

## CAPITAL PROJECTS FUNDS

Capital projects funds account for the resources used by the District for the acquisition and/or construction of capital facilities. The capital projects fund maintained by the District is as follows:

Capital Projects Fund - To account for school construction projects financed through serial bond issues and government grants.

Fire Prevention and Safety Fund - To account for resources to be used for the purpose of altering, reconstructing and repairing the existing school buildings of the District.

## FIDUCIARY FUNDS

#### AGENCY FUNDS

Agency funds consist of resources held by the District as trustee to be expended or invested in accordance with its agency capacity. The District's many student activity accounts are classified as Agency Funds. These funds are custodial in nature and do not involve measurement of results of operations. Assets are equal to the amounts due the student groups.

## STATISTICAL SECTION

This part of the District's Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the District's overall financial health.

## **Financial Trends**

These schedules contain trend information to help the reader understand how the District's financial performance and well-being have changed over time.

#### **Revenue Capacity**

These schedules contain information to help the reader assess the District's most significant local revenue source, property tax.

## **Debt Capacity**

These schedules present information to help the reader assess the affordability of the District's current levels of outstanding debt and the District's ability to issue additional debt in the future.

#### **Demographic and Economic Information**

These schedules offer demographic and economic indicators to help the reader understand the environment within which the District's financial activities take place.

## **Operating Information**

These schedules contain service and infrastructure data to help the reader understand how the information in the District's financial report relates to the services the District provides and the activities it performs.

#### Sources:

Unless otherwise noted, the information in these schedules is derived from the Annual Financial Reports and Comprehensive Annual Financial Reports for the relevant year.

Source: Annual Financial Statements 2006-2015.

Notes: The information is presented in the modified cash basis for years 2008 and prior, and the accrual basis beginning in 2009.

- \*\* Effective July 1, 2013, the District adopted provisions of Governmental Accounting Standards Board Statements No. 65 ("GASB 65"), *Items Previously Recorded as Assets and Liabilities.* Pursuant to GASB 65 debt issuance costs should be recognized in the period incurred as an expense. Therefore, the District retrospectively restated the Net Position of the Governmental Activities for the year 2013. For the year 2012 and prior, the Net Position has not been restated and is shown as originally reported.
- \*\*\* Effective July 1, 2014, the District adopted provisions of Governmental Accounting Standards Board Statements No. 68 ("GASB 68"), Accounting and Financial Reporting for Pensions . Pursuant to GASB 68 the District recognized their long-term pension obligations and retrospectively restated the Net Position of the Governmental Activities for the year 2014. For the year 2013 and prior, the Net Position has not been restated for purposes related to GASB 68 and is shown as originally reported or restated as a result of a past GASB implementation.

Note: The information is presented on the modified cash basis for years 2008 and prior, and the modified accrual basis beginning in 2009.

\*\*\* Effective July 1, 2010, the District adopted the provisions of Governmental Accounting Standards Board Statement No. 54 ("GASB 54"), Fund Balance Reporting and Government Fund Type Definitions. This statement establishes fund balance classifications of Restricted, Committed, Assigned and Unassigned. Fund balances will not be classified as Reserved or Unreserved beginning in fiscal year 2011. In addition, this statement reclassified the working cash fund balance to be included within the General Fund. This page left blank intentionally.

### Miscellaneous Statistics June 30, 2015

The District boundaries extend into three counties: Cook, DuPage and Kane	
Date of incorporation	1875
Median family income	
Kane County	69,530 *
City of Elgin	58,675 *
Per capita personal income	
Kane County	30,082 *
City of Elgin	23,453 *
Population	
Kane County	527,306 *
City of Elgin	111,117
Area served	90 Square miles
Number of schools	57
Student population	40,387
Certified staff	2,311
	2,011
Pupil/certified staff ratio	17/1
Faculty holding master's degree or higher	1,563
	1,000

Communities served:

School District U-46 serves Bartlett, and portions of Carol Stream, Elgin, Hanover Park, Hoffman Estates, Schaumburg, South Elgin, St. Charles, Streamwood, Wayne and West Chicago.
